Objective

Computer Science undergraduate (CGPA: 9.48) with hands-on full-stack experience building responsive frontends (React.js) and backend REST APIs (Flask, Node.js/Express.js) with SQL/NoSQL databases, a Salesforce Platform Developer certification, and practical exposure to machine learning and CI/CD workflows. Seeking a Software Developer role to contribute clean, well-tested code to production applications.

Education

Vardhaman College of Engineering

Hyderabad, India

B.Tech in Computer Science & Engineering | CGPA: 9.48 | Batch 2027 2023–Present **Sri Chaitanya Junior College**
Telangana, India

Intermediate – Mathematics, Physics & Chemistry | 9.72/10

2021–2023

Internship Experience

AICTE TechSaksham (Microsoft & SAP)

Feb 2025–Aug 2025

Full Stack & Artificial Intelligence (AI) Intern

Remote

- Built and maintained REST APIs in Python (Flask) serving 500+ records with optimized queries and modular architecture.
- Designed and managed a MongoDB NoSQL schema for scalable, efficient application data storage and retrieval.
- Automated deployment and release pipelines using Docker and GitHub Actions, cutting manual deployment effort by 60%.
- Performed integration testing, debugging, and code reviews to ensure software quality and maintainability.

Projects

CropSense – AI-Powered Crop Recommendation System

2025–Present

React.js, Flask, MongoDB, Random Forest, JWT, Tailwind CSS, OpenWeather API

- Built a full-stack AI application recommending optimal crops using Random Forest (99.55% accuracy).
- Integrated OpenWeatherMap API, JWT authentication, MongoDB, and prediction history dashboard.
- Implemented real-time weather integration, seasonal recommendations, and responsive UI.

Smart Rainfall & Drought Prediction System

Oct 2025–Present

Python, Scikit-learn, XGBoost, Pandas, NumPy

- Collected and preprocessed 10+ years of climate data, applying feature engineering and outlier removal for clean, model-ready datasets.
- Built and benchmarked machine learning models (Random Forest, XGBoost, Linear Regression), evaluating performance using RMSE, MAE, and R^2 .

EdgeShield AI – Intelligent IoT Intrusion Detection & Threat Explanation

2025–Present

React.js, FastAPI, Python, PostgreSQL, Scikit-learn, XGBoost, Docker, Gemini API

- Developed an AI-powered Intrusion Detection System (IDS) to detect and classify cyberattacks in IoT networks using machine learning models.
- Built a FastAPI backend and React dashboard for real-time threat monitoring, attack visualization, and incident management.
- Integrated Generative AI to explain detected attacks, assess threat severity, and generate actionable mitigation recommendations.
- Containerized the application using Docker and designed a scalable architecture supporting secure API communication and persistent storage.

Technical Skills

Languages: Java, Python, JavaScript (ES6), TypeScript, SQL, C

Web & Frameworks: React.js, Node.js, Express.js, Flask, HTML5, CSS3

Databases: MongoDB, MySQL, PostgreSQL

Machine Learning: Scikit-learn, XGBoost, Pandas, NumPy, Matplotlib, Seaborn

Core CS: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, Operating Systems

Automation & Tools: Git, GitHub, Docker, GitHub Actions (CI/CD), Postman, Linux, Agile/Scrum, Code Reviews

Soft Skills: Strong Problem-Solving, Self-Motivated & Self-Learner, Cross-Functional Collaboration, Clear Communication

Certifications & Achievements

- Salesforce Certified Platform Developer I – Salesforce, Mar 2026 (Credential ID: 7605468).
- Salesforce Certified Agentforce Specialist – Salesforce, Dec 2025.
- Earned the Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate credential – Oracle University.
- Solved 400+ Data Structures & Algorithms (DSA) problems on LeetCode, earning the 50 Days Active Badge.
- Achieved a CGPA of 9.48 through consistent academic performance in undergraduate coursework.
- Earned the Java Foundation Certification – Infosys, 2025.
- Completed TCS iON Career Edge – Young Professional Program – TCS, 2025.
