Professional Summary

Detail-oriented Computer Science undergraduate with strong foundations in software engineering, Java/Python programming, and full-stack development. Experienced in building scalable applications, debugging, and collaborating in cross-functional environments. Hands-on exposure to ML/NLP, problem-solving, and version control. Eager to join Honeywell as a Software Engineering Intern to contribute to high-quality software solutions and grow in a real-world engineering environment.

Professional Experience

**AICTE-Internship with TechSaksham – Microsoft & SAP ·
Edunet Foundation**

Virtual internship ·
Feb 2025 - Aug 2025

- Developed and fine-tuned an AI-powered resume screening system, improving matching efficiency and reducing manual screening time.
- Implemented machine learning and NLP algorithms to extract key skills and rank resumes based on job relevance.
- Built a recruiter dashboard (Streamlit) for real-time tracking and filtering of candidate profiles
- Coordinated with stakeholders to translate hiring pain points into user-friendly features and actionable insights.

Web Development Intern · Cognifyz Technologies

Virtual internship · Jul 2023 - Aug 2023

- Developed dynamic and responsive web applications using HTML, CSS, JavaScript, and React.js.
- Optimized website performance, resulting in improved load speed and user experience.
- Implemented API integrations to fetch and display real-time data, enhancing application functionality.
- Delivered all assigned features on time, collaborating closely with the development team.

Dec 2025 - Dec 2025

[NLP](#) [Python](#) [Data Science](#) [Machine Learning](#) [Java](#) [MongoDB](#) [Streamlit](#)

- Built a resume screening tool using **NLP + ML**, automating skill extraction and ranking.
- Achieved a **60% faster candidate evaluation**, reducing time-to-hire by ~25 days.
- Developed a **Streamlit-based dashboard** for recruiters to filter, rank, and compare applicants based on skills, experience, and relevance.
- Generated data-driven recommendations and personalized job suggestions for candidates.

Smart Rainfall and Drought Prediction System ·

Oct 2025 - Present

[Data Analysis](#) [Data Visualization](#) [Streamlit](#) [Machine Learning](#) [Python](#)

- Trained predictive models using **historical IMD / Kaggle** datasets to forecast rainfall and drought likelihood
- Leveraged Python (Pandas, Scikit-learn) for data preprocessing, model building, and evaluation.
- Created an interactive **Streamlit dashboard** to visualize weather trends, monthly predictions, and temperature anomalies.

Education

**Bachelor of Technology · Computer Science and Engineering ·
Vardhaman College Of Engineering**
